(54) Title: METHODS OF PROCESSING AND DISPLAYING IMAGES AND DISPLAY DEVICE USING THE METHODS

(57) Abstract: The invention proposes methods of processing and displaying images comprising the steps of: - modification of the colour (C1) in at least one pixel of an image source; and - calculation of the colour of the pixel in the processed images (C3, C4), in such a way that the average of the colours of said pixel in the processed images (C3, C4) is equal to the average of the colours of said pixel in the source image or images (C1). The resulting colour of the display of the processed images as regards the human eye is therefore the desired colour in the source image or images, whereas a camcorder will record an unsatisfactory mixture of the modified colours.
